

# Smart telephony made simple

*From telephone to useful assistant*

Switch to a smarter phone system built to help you and your customers. With CleverCall, you get a solution that not only accepts calls but also answers them. You get your very own Voicebot, which you can easily tailor to your company's needs. All at a sharp price.

## Help your customers 24/7

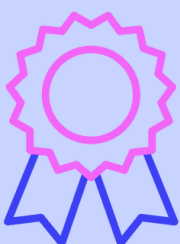

The Voicebot works 24/7. Your customers can always call and get answers to crucial questions - even when the moment of purchase is at 22 in the evening.

## Relieve your employees

The Voicebot typically handles up to 70% of all inquiries. Give your employees more time and less stress when they're not constantly delayed by the phone.

## More time to convert sales

The Voicebot spots when the potential for additional sales arises. The call is forwarded to an available employee, who now has more time to convert the sale.

Smaller companies typically choose:

**Basic plan**
