

# The ultimate all-around phone system

*Optimize your business and free up massive resources*

Large organizations receive many calls both externally and internally. CleverCall's AI contact center is a smart overall solution that can optimize several departments – from customer service, sales, internal support, to HR. Many organizations choose to start with one department and expand continuously.

## Help customers and employees 24/7

The Voicebot is open 24/7. Your customers or employees can always call and get answers to questions. You become more available and adapt to the expectations of flexibility and fast service.

## Strengthen your business intelligence

Transform words into data and data into value-creating insights. The Voicebot's speech analytics give you an overview of opportunities and trends - e.g. through sentiment analysis.

## Save enormous resources

In addition to increasing the service level, CleverCall's greatest strength is freeing up resources - such as time, energy, and finances - to create a smarter organization.

Large companies typically choose:

**Premium plan**
